

Dental Procedure Consent Part A

Owner: _____ Pet: _____

Phone Numbers(s): _____

Items left with patient: _____

Additional procedures: _____

Consent for General Anesthesia and Dental Procedures:

I have been given an explanation and understand the nature of the dental procedure and the risks involved. I also understand that there are risks associated with anesthesia. If unforeseen conditions or complications arise during the procedure, Towne Animal Clinic will attempt to contact me. If I cannot be reached I give my consent for Towne Animal Clinic to take the steps necessary in the best interest of my pet.

The degree of dental disease cannot be fully assessed until my pet is under anesthesia. At that time diseased teeth are often found and may need additional treatment or extraction; often X-Rays are needed to make these treatment decisions. The approximate costs for these procedures are:

Major tooth extraction: \$139.50-244.90 Minor tooth extraction: \$45.20 Periodontal Treatment \$55-90
Dental X-Ray Series (unlimited number): \$106.50 Gingivectomy \$82.20

I authorize x-rays, treatment and/or extraction of diseased teeth if the doctor feels these are appropriate. **Accept**_____ **Decline**_____ **Call First** _____

I understand that if I decline tooth extractions and dental x-rays or if the doctor is unable to reach me at the above number(s), a second anesthetic procedure may be necessary to address these problems.

Consent Part B

Please indicate if you would like any of the following performed:

Pre-anesthetic Blood Screen (\$93.60): *A minimum recommended for all pets undergoing anesthesia.* Helps detect underlying conditions that might increase the risk of anesthesia or surgery. If there are abnormalities, the veterinarian will contact you prior to anesthesia and appropriate steps will be taken to ensure the safety of your pet.

Accept _____ Decline _____

OR

Complete Blood Panel (\$144.00): *Recommended for pets 7 years and older.* This blood panel is more comprehensive than the pre-anesthetic blood screen and can detect a more complete range of age-related problems.

Accept _____ Decline _____

Pre-anesthetic ECG for Dogs and Pro BNP blood test for Cats (\$74.10): *Recommended for all pets, especially ones 7 years or older.* An ECG for Dogs and Pro BNP for Cats can reveal potential problems with heart function and disease. If any abnormalities are evident, we will contact you prior to anesthesia.

Accept _____ Decline _____

Fluid Therapy. *Recommended for all pets.* Fluids help protect your pet's kidneys, heart and other organs, shorten recovery time after anesthesia, and keep your pet more comfortable. Based on your pet's age, state of health, and length of procedure, the doctor will determine the most beneficial route of administration: Intravenous (\$99.60) or Subcutaneous (\$48.40). May we administer fluids to your pet?

Yes _____ No _____

Microchip Identification (\$58.50) *Recommended for all pets.* This chip is implanted under the skin between the shoulder blades, it allows veterinary hospitals and shelters to identify your pet if lost or stolen. Identification is done via a special scanner which reads the chip and displays your pet's unique ID number. Our fees cover the cost of the chip and implantation. **Lost pet registration is included at no additional charge.**
